

# Table of Contents

1. Free sample .....	1
2. Introduction .....	2
3. A gentle introduction to ECMAScript 6 .....	5
3.1. Transpilers .....	5
3.2. let .....	6
3.3. Constants .....	7
3.4. Creating objects .....	7
3.5. Destructuring assignment .....	8
3.6. Default parameters and values .....	10
3.7. Rest operator .....	12
3.8. Classes .....	13
3.9. Promises .....	15
3.10. Arrow functions .....	18
3.11. Sets and Maps .....	21
3.12. Template literals .....	22
3.13. Modules .....	22
3.14. Conclusion .....	24
4. Going further than ES6 .....	25
4.1. Dynamic, static and optional types .....	25
4.2. Enters TypeScript .....	26
4.3. A practical example with DI .....	26
5. Diving into TypeScript .....	29
5.1. Types as in TypeScript .....	29
5.2. Enums .....	30
5.3. Return types .....	30
5.4. Interfaces .....	31
5.5. Optional arguments .....	31
5.6. Functions as property .....	32
5.7. Classes .....	32
5.8. Working with other libraries .....	34
5.9. Decorators .....	35
6. The wonderful land of Web Components .....	38
6.1. A brave new world .....	38
6.2. Custom elements .....	39
6.3. Shadow DOM .....	39
6.4. Template .....	40
6.5. HTML imports .....	41
6.6. Polymer and X-tag .....	41
